

Vertical Belt Heat Shrinking Machine

RSM-HSM-S01

Feature

- ▶ Quicker heating up and higher thermal efficiency guaranteed by Elstein infrared heating plate, to make even and robust shrinking.
- ▶ Enhance productivity by automatic release after complete shrinking while continuous cable loading for heat shrink and adjustable
- ▶ Operation safety guaranteed. No burn operator by unique heat insulation and heat dissipation system.
- ▶ High flexibility. Harness length limit is reduced because heat shrinking part faces down.
- ▶ Slim-profile benchtop design for limited operation space or environment with special layout.

Specification

Model	RSM-HSM-S01
Application	Low voltage harness with heat shrink tube at end position
Heating Method	Infrared radiation heating
Temperature Range	0~550℃
Work Mode	Continuous cable loading for heat shrink and automatic release after complete shrinking
Power	1.7KW
Voltage	AC220V/50HZ
Current	8A
Dimension	L450mm*W300mm*H310mm
