

HST Shrinking Machine

RSM-HST-30

Feature

- ▶ 360° heat and shrink the heat shrinkable tube in an even way to make sure excellent insulation protection and enhance overall beauty of the wire harness.
- ▶ Heat insulating cover is filled with thermal insulation material to isolate the internal and external temperatures, which can save energy and protect operators.
- ▶ Greater flexibility. Suitable for heating multiple wire harnesses at once and various wire harnesses (short cables, large gauge cables, extra long cables and cables with terminal).
- ▶ Heating time adjustable, an ideal tool compared with traditional heat gun.
- ▶ Optimized for space. The machine is so compact that it can be put on the workbench and combined with other machines to increase efficiency.

Specification

Model	RSM-HST-30
Tube Material	Common heat shrinkable tube, transparent heat shrink tube
Tube O.D.	<30mm
Shrinking Method	360 degree thermal cyclone
Temperature	600°C (under room temperature)
Start Mode	Sensor/foot switch
Power	2000w
Voltage	220V/50-60HZ (single phase)
Dimension	L550mm*W400mm*H380mm
Optional	With water circulation function, heating body automatic cooling
