

I-PEX Terminal Crimping Machine

RSM-PEX-01C

Feature

- ▶ Specialized for the connection of coaxial wire and special continuous terminals. Terminal cutting, forming, crimping in one single operation.
- ▶ Adopt pneumatic components from SMC to guarantee more stable and durable operation with more than 5 years of service life.
- ▶ The electrical part adopts modularization for greater energy efficiency and stability.
- ▶ All the crimping tools are made of imported high-speed steel, with a service life of more than 300,000 times.
- ▶ Strong compatibility. Different crimping modules can be interchangeable.
- ▶ Using motor to ensure accurate and efficient terminal feeding.
- ▶ High flexibility. User-friendly PLC control can converted between manual and automatic mode, improving the production adaptability.
- ▶ Compact design to save space compared with traditional crimping press.

Specification

Model	RSM-PEX-01C
Applicable Terminal	I-PEX series precision terminal and other related terminal
Wire O.D.	0.81mm, 1.13mm, 1.32mm, 1.37mm, 1.78mm
Productivity	1600pcs/h (depends on proficiency)
Air Source	0.5~0.7Mpa (5-7bar)
Voltage	AC220-240V, 50-60HZ; 300VA
Noise	<70db (A)
Weight	10kg
Dimension	L475mmxW600mmxH210mm (controller included)
