

Spot Taping Machine

RSM-TW-DC03

Feature

- It can solve the spot taping requirement of different spacing on the same cable.
Higher flexibility. Distance between taping heads adjustable and tape of different materials can be changed on request.
- Higher productivity. Cycle time is 5-6 seconds (3 points at the same time) and five times more efficient than manual operation.
- Customization available. The machine can increase or decrease the stations acc. to your request.

Specification

Model	RSM-TW-DC03
Cable O.D.	2-7 mm (Customizable)
Tape Width	10-19 mm (Customizable)
Tape Length	22-60 mm
Applicable Tape	PVC, cloth-base tape, velvet-base tape, high-temperature fiberglass tape and other material tape
Distance Between Stations	Min. 65 mm
Distance Between 1st and 2nd Station	Max. 550mm
Taping Accuracy	±0.5mm
Productivity	5s (simultaneous spot taping)
Voltage	220V (single phase)/ 50Hz
Weight	About 95kg
Dimension	L700mm×W550mm×H550mm
