

Four-position simultaneous spot taping machine

RSM-TW-DC04

Feature

- ▶ Independently researched and developed with intellectual property patent from taping structure and method to invent equipment
- ▶ It can simultaneously solve taping requirements of different lengths and different distances on the same wire harness.
- ▶ The space of each taping head is adjustable, different tape can be loaded according to the requirements
- ▶ High automatically, the operator only needs to load cable, foot operation, unload cable, can realize four point simultaneous spot taping
- ▶ The productivity of a machine is at least five times higher than that of human, and it takes an average of 6-7s to taping four positions simultaneously
- ▶ Non-standard customized type, can be customized according to customer requirements double, three, four, or no position machine etc.

Specification

Model	RSM-TW-DC04
Voltage	AC 220V/50HZ
Accuracy	±0.5mm
Productivity	Average 6s/four-position spot taping at the same time
Taping width	10-19mm
Taping space	The maximum space between the first and fourth is 550mm and the minimum space in adjacent positions is 65mm
Applicable wire O.D.	2-7mm(beyond range could be customize)
